

Evidenced Based Research

Curtin University

Animal Fun is a unique program designed to promote motor skills and social skill development in young children aged 3-6 years. Based on imitating animal movements, Animal Fun allows children to practice and develop their skills within an imaginative, play environment.

Flexible and so simple to use, Animal Fun Activities can be embedded into the everyday routines and rituals of the child.

Whilst this program is designed to be inclusive and suitable for children of all abilities it may be particularly beneficial for children with motor coordination problems such as Developmental Coordination Disorder (DCD).

4th November 2017, Saturday 9.30-12.30pm
