

Fast track to Teaching Reading with Phonics to 3 - 8 years Olds

Using Bob Books approach.

American's #1
Learning to read Program.

Bob Books is a key component in **Sound Partners**, a tutoring program in phonics-based early reading, developed by **Patricia Vadasy**, Ph.D. in Curriculum and Instruction, and Early Reading Instruction, University of Washington, USA.

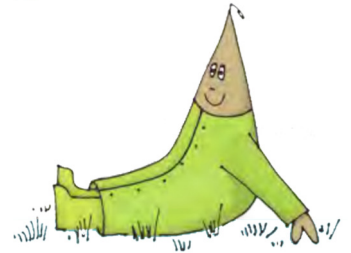

Bob Books is a true beginning reader series, designed for children that are in the very earliest stages of learning to read.

Parents and teachers keep coming back to our series, because the clean layout, short words, and simple phonics make learning to read a fun and natural step for a child that knows the alphabet.

That's why Bob Books work so well!

If you want a truly simple and easy way to encourage reading, you need Bob books! This is based on the series becoming best-sellers since 1970.

“As educators, you have lots of information about theories and strategies for teaching English.

How you deliver that content to your students matters. Are they interested? Are they engaged? Research (and common sense) shows that students learn best when they are attentive, curious, and involved. How do you stimulate the students in your classroom?

We are hard wired to engage with Story. Bob books focused on wrapping the best practices for phonics teaching in the envelope of an interesting, funny, engrossing book. Even with a vocabulary limited to three letter words, kids respond to a story arc of beginning, middle, and end; character development; and a happy dose of humour.”

Conducted by Juriah Atan, VC Jolly Phonics trainer, Professional Storyteller, and teacher.
