

Chess Through Music & Movement

a targeted approach for Children ages 4 and above.

**FREE introduction course
for adults and children**

Do you want your child to enhance his or her thinking skills?
Do you want them to be more reflective and make better decisions?
Do you want them to develop better resilience?

- Children learn how the pieces move through movement and music and this multisensory approach ensures quicker learning and a better understanding of chess as a whole.
- In just 10 lessons your child can become a 'competitive' chess player who not only knows how the pieces move but basic opening theory, tactics and checkmate patterns.
- They also learn 'good chess manners' and (very importantly) resilience.
