

## Reading Books for **Phase 2** in 'Letters and Sounds'

Dandelion Launchers is a new Synthetic Phonics reading series for beginner readers at Foundation Stage. It comprises **twenty eight books, four books at each of seven levels.**

The books precede and supplement the **Dandelion Readers** series. Dandelion Launchers can be used with any phonics programme.

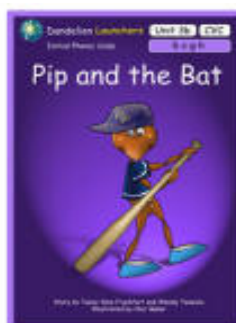

- The series offers the beginner reader one line of text at CVC (consonant-vowel-consonant) word level.
- Each level introduces new sounds of the alphabet and includes the sounds in previous levels.
- At every stage the reader can read four different books.
- Each book includes a clear explanation on how to read with Synthetic Phonics and a game to motivate the reader and consolidate phonic skills.
- With delightful illustrations and entertaining stories, the books encourage the beginner reader to blend sounds into words.
- The reader experiences success at every level and discovers the thrill of independent reading from the very beginning.
